5D technology - 5D technology, also known as LayOut, is a high-end application that provides similar capabilities to 3D Design Review or CATIA/Simplifie CAD. It is made by the same company, Autodesk. The first version was released in October 1997. 5D technology does not use AutoLISP but has a user interface based on Microsoft Windows applications, using the same UI conventions. However, it is considered to be an "older brother" to the original AutoCAD. References

I have a form on a page that is based on the MasterPage in my application. How can I place a placeholder or any control (e.g. a textbox) on the page so the user can edit its content before he submits the form? The form is a PartialView and its view is rendered on a page that is a View that uses the master page.

Edit: I want a placeholder where the user can edit the content. A: I have solved my problem with an Ajax.BeginForm(). I added a Html.RenderPartial() on my master page to render a form that contains a place holder for the content the user is editing. WO 00/65951 discloses a multiple label stock material in which an adhesive label layer is arranged on a support, the

adhesive label layer having a first adhesive face and a second adhesive face. Between the adhesive faces are provided a plurality of separation layers for separating the adhesive label layer from the support. The separation layers are formed of a material that is different from the adhesive label layer. The adhesive label layer is divided into at least two zones by the separation a1d647c40b
