I simply want the text inside the attribute value. You can see the attribute value in the screenshot below. Does anybody know how to get this? Thanks A: Product attributes in PrestaShop are stored in database as text, you can get them from it with SQL queries. Usually they are in table attributes. Then if you get all records you can call the product id to get the product associated attribute data like here: \$product = new Product(); \$product->load(\$id); \$attributeCode = \$product->getAttributeText(\$attributeCode); \$attributeLink = \$product->getAttributeLink(\$attributeCode); if you get a typo error then you need to change the \$attributeCode into \$attributeCode.'attribute_code' Sexy woman who loves to have great fun is Luanne Spana Busty whore Luanne Spana calls herself the wildest of all, but in reality she's just a slut who loves to have fun in bed.
